

How to Set up Mobile App

STEP 1

Install **Webeye** by downloading it from your Apple device's **App Store** or Android's **Market**

When the application is successfully installed, the WebEye icon appears on the device

STEP 2

Add your DVR Unit(s) to the Webeye App

Launch the WebEye app. Then, the Unit List screen will appear

In the Unit List screen, tap on the add button.

Make sure to select **Static** or **Dynamic** as it applies to you

In the appropriate fields, type the IP Address, User ID and PORT numbers, ID and Password of the DVR

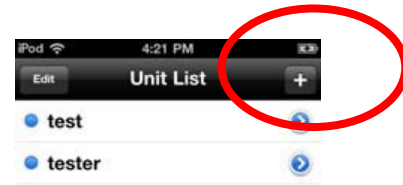

Default username is **admin** and password **12345**

Tap **FIND**

Select the DVR that appears on the following page

Tap **SAVE**

The DVR will appear and in the Unit List.

STEP 3

Live Video Viewing

Launch Webeye App

From Unit List, Tap on your DVR name

The first four pictures will soon load

Tap on an image to view only one camera

Slide finger to select next camera

Tap on **Multi** to go back to four camera view

Slide finger to see the next set(s) of cameras four at a time
